Stairway Lift Installation

The Visit

One of our certified technicians will visit you at your home to personally measure for your stairlift and evaluate your specific needs. The visit itself should take no more than 30 minutes.

The On-Site Quote

That same day, we'll provide you with a complete quote on the cost of the lift and installation.

The Installation

We can have your lift installed in as little as 24-48 hours from the time we visit your home - at no additional cost! Our professionally trained service technicians will gladly come to your home to deliver, set-up and demonstrate equipment.

The Service

We offer yearly preventative maintenance plans that will keep your equipment in top-operating condition for many years to come. Should anything go wrong, just call us and one of our technicians will visit your home to solve the problem.
